

Volumetric Flasks, NALGENE®, IDL

Autoclavable volumetric flasks made of polypropylene or transparent polymethylpentene with polypropylene screw closure. Every flask is gravimetrically calibrated for filling and for pouring at 20°C. No meniscus, which makes for easy, precise read-offs. Oval marking spot. Non-contaminating screw closure without insert. Leakproof. Volumetric flasks are compliant with ISO standard 384 and ASTM standard E 288.

① Volumetric flasks made of polypropylene

Volume ml	Tolerance ± ml	Cap Ø mm	Height mm	Order No.
50	0.1	13	146	23 87 40001
100	0.16	20	184	23 87 40002
200	0.2	20	209	23 87 40013
250	0.24	20	222	23 87 40003
500	0.4	24	279	23 87 40004
1000	0.6	28	317	23 87 40005

Volumetric flasks made of polymethylpentene
