

Acid and Bases Cabinets, LAT

These cabinets made of light grey polypropylene are ideal for storing acids and bases. The drawers are designed as leak-proof PP trays running on PP slide rails. This means that all materials are corrosion-resistant. In addition to the standard portfolio of tall cabinets and floor units, cabinets tailored to the customer's dimensional requirements are available on request.

Article	Height × Width × Depth mm	Weight kg	Order No.
Tall cupboard	2050 × 600 × 520	120	10 20 15110
Base cabinet	720 × 600 × 520	60	10 20 15120

Special models are possible after arrangement.
