

Bottles for Water Sampling, PP, ISOLAB

Manufactured from polypropylene for taking, transporting and storing of water samples for microbiological analysis. They can be used for all analysis where a sterile sample is required.

Bottles are manufactured at aseptically sterile production halls and then sent to gamma sterilisation. Such informations as lot number, production and expiry dates etc are indicated

on the packing.

Square bottle form offers easy handling and optimum space saving solutions. GL 50 wide bottle neck provides easy filling and pouring. Cap with large ridges with increased grip featured with self lock and internal security ring. Cap inner design ensures hermetical and leak-proof closure. Caps are made of polyethylene.

Embossed volume graduations on wall side offer better liquid level viewing.

Alternative 2 bottles:

- Without sodium thiosulfate
- With sodium thiosulfate

Bottles with sodium thiosulfate (20 mg/l – according to ISO/FIS 19458/2006 standard) are ideal for water analysis where chlorine may modify the composition of the sample.

Alternative 2 packing:

- “Bulk packed”, where bottles are packed as a group in a box.
- “Single packed”, where bottles are first individually packed in P.E bags and then repacked in a box.

Alternative 2 colors:

- Clear bottles
- Amber bottles

Sterile, bulk packed
