HPLC Starter Kits - BlueLine

Safe screw caps for reliable solvent supply to HPLC and UHPLC systems. The Starter Kits provide the **complete initial equipment** for up to four reservoir bottles and protect laboratory personnel from hazardous solvent vapors. Compatible with all common GL-45 laboratory bottles (SCHOTT, DURAN, WHEATON, KIMBLE/DWK).

- ✓ Safe solvent delivery via closed extraction system
- ✓ Hermetically sealed
- ✓ Plug-and-play solution

A 399 202

BlueLine

Kit including air valves and fittings. Unused connections can be sealed with blind plugs.

	Qty	PU	Order No.	Special Price/PU
HPLC Starter Kit I	Set	1	399200	209.00 €
HPLC Starter Kit II	Set	1	399201	219.00 €
A HPLC Starter Kit III	Set	1	399202	229.00 €

HPLC Starter Kits - GreenLine

PFAS-compliant Safety Caps without fluorinated materials. **Core** made of polyetheretherketone (PEEK) – a **high-performance, fluorine-free plastic**. No fluorine contamination → reliable, undistorted PFAS measurement results.

All the features of BlueLine + additional:

- + Visibly sustainable – setting an example
- + Full regulatory compliance
- + PFAS-free analytics

STAINLESS STEEL PRODUCTS

Spatulas in a wide range of sizes and styles for every need

www.buerkle.de

Stainless steel laboratory beaker

Griffin beaker, stainless steel beaker with spout

The stainless steel laboratory beaker with its classic shape is an indispensable aid for precise and safe applications in everyday laboratory work. Made from high-quality stainless steel (1,4301), it impresses with its outstanding resistance to corrosion and chemicals – even when used intensively.

The large selection of volumes means that a suitable beaker is available for a wide range of requirements.

- With spout and rim for safe and clean working
- Smooth surface – easy to clean, hygienic
- Corrosion and chemical resistant
- Autoclavable, food-safe, unbreakable, versatile in use

Mini Diaphragm Vacuum Pump

LABOPORT® N 96

Reliable vacuum for clean results.
Compact, powerful, fast.

The smallest chemical resistant pump in our new LABOPORT® series, the N 96 combines a high flow rate with a compact design, saving valuable space in the laboratory. Thanks to the manual rotational speed control, the N 96 is quiet, very energy efficient, and can be optimally adjusted in accordance with the application. The next generation of Laboport pumps

are equipped with an easy-to-clean surface. Potential applications include filtration, SPE, and liquid aspiration using a vacuum.

- Flow rate of 0.3 – 0.42 m³/h, ultimate vacuum of < 130 mbar abs.
- Very small footprint
- Integrated rotational speed control
- PTFE-coated diaphragm for use with aggressive/corrosive gases and vapors

Pipette tips in TipStack refill system BIO-CERT® LIQUID HANDLING QUALITY, PP

Pipette tips from BRAND offer reliable quality for precise and demanding analyses.

New: the TipStack refill system. A tip tower containing 5 filled tip-trays and a TipBox constitute the space-saving refill system for 20 µl, 200 µl and 1,000 µl tips.

Tightly sealing spacers prevent the tips from getting stuck together, and ensure them to be free from DNA, RNases, endotoxins and ATP. The sterile TipStacks are supplied with a transfer aid for contamination-free use in a previously sterilized TipBox.

Pipette tips, palletized, TipStack

MultiLine® Multi IDS – the professional class of portable measuring devices

MultiLine® Multi IDS 3620 with 2 measuring channels

The MultiLine® Multi IDS 3620 represents the professional class of portable field measuring devices. Equipped with intelligent IDS technology (Intelligent Digital Sensor), these devices automatically recognize all connected sensors and load their calibration data. Ideal for demanding field measurements with the highest requirements for accuracy, documentation, and flexibility.

Highlights:

- Measures pH, ORP (mV), conductivity (specific resistance, TDS, salinity), dissolved oxygen (concentration, partial pressure, saturation, turbidity,

and temperature (measuring range of the respective IDS sensor)

- 2 universal measuring channels
- Water- and dust-proof according to IP 67
- Keyboard made from a single piece – no gaps
- Easy to clean with a soft brush under running water
- Includes practical case & buffers
- Two waterproof USB interfaces
- NiMH rechargeable batteries for efficient mobile operation
- Stationary power supply via power adapter or USB interface
- Prepared for IDS radio modules
- GLP/AQS-compliant documentation accuracy, documentation, and flexibility.

High-Quality Laboratory Glassware
for Reliable Daily Use

Engineered for accuracy and ease — with a spout for controlled pouring.

Accurate measurement and ease of handling are essential in any laboratory setting. This range of borosilicate glassware is made to support daily workflows, combining durability with practical features.

Each beaker includes a precisely shaped spout for clean, controlled pouring and a clearly printed scale for estimating volume at a glance. The glass is resistant to thermal and chemical stress, making it suitable for routine applications.

KEY FEATURES

- Clean-pour spout for accurate handling
- Durable, easy-to-read volume markings
- Made from borosilicate glass 3.3
- Suitable for general lab use

A dependable choice for consistent, everyday performance.

Practical reference for
precise calibrations

The practical reference set based on the testo 735-2 combines high precision temperature measurement with DAkkS calibration* and is ideally suited for system adjustment and compliant calibrations in pharmaceutical and laboratory environments. With as few as 20 calibrations, the practical reference set pays for itself compared to external ISO calibration. Detect deviations or system drifts at any time – even outside the recommended calibration intervals.

Additional advantages of the testo 735-2:

- Data memory for up to 10,000 measurement values
- Professional measurement point management via PC software and USB data transfer

* DAkkS calibration is not included in the scope of delivery, but can be offered additionally upon request, including your individual measurement points.

Julabo
THE TEMPERATURE CONTROL COMPANY

VALEGRO™

The Latest Generation of JULABO Recirculating Coolers

With the brand new VALEGRO recirculating coolers, JULABO is launching modern, powerful cooling units with natural refrigerant. The recirculating coolers have been developed with the greatest focus on user-friendliness and operational safety within a working temperature range of -20 ... +40 °C.

The new recirculating coolers score with a very high performance/output in relation to their small size.

Lab fume hoods for every application

Perfectly tailored to your needs we offer the ideal fume hood certified according to DIN EN 14175. Color: Light gray (similar to RAL 7035); metal frame: Dove blue (similar to RAL 5014).

Features:

- MA95FLOW electronic control unit with display, audible and visual alarm
- Multilingual operating software
- Vertical sash with horizontally sliding safety glass
- Locking device when the sash is open 50 cm
- SAFETY-BLOCK device for the sash to prevent it from falling in the event of cable breakage
- HPL lining, solid ceramic worktop with reinforced edge
- IP65 LED lighting (600 LUX) in the fume hood ceiling

- 1 Fume hood for general use
- 2 Fume hood for weighing with anti vibration worktop
- 3 Fume hood for powders
- 4 Fume hood for acidic vapors
- 5 Fume hood with low entry
- 6 Walk-in fume hood

Optional: Filter box

Optional: Absence sensor

Optional: Side window

Optional: Airflow Control

Optional: Media bar on the side

Optional: Safety cabinet (chemical cabinet/ acid and alkali cabinet)

Optional: Fan on the extractor hood

Optional: Device for tripod poles made of stainless steel

Optional: Funnel basin/sink

Aluminum trays set of 50 MB

High-quality disposable weighing pans made of pure aluminum. Ideal for precise weighing, weighing in, drying, and filling powders, solids, and liquids.

Our aluminum weighing pans are indispensable tools in everyday laboratory work. They are made of lightweight, oil-free aluminum, which prevents sample contamination. The smooth bottom ensures optimal sample distribution, while the corrugated sides increase stability.

- **Heat resistant:** Ideal for use in moisture analyzers, drying cabinets, or evaporation processes.
- **Versatile:** Weighing, storage, sample transfer, dust protection.
- **Disposable product:** Minimizes cleaning effort and the risk of cross-contamination.
- **Stable & lightweight:** Flat bottom for secure positioning on the analytical balance.
- **Handling:** Easy to separate and stack.
